Audiomoth/Snyper (removed 3 Feb 2022)

This is an interactive geospatial pdf (GeoPDF). To change visible layers, open with Adobe Acrobat Reader DC, navigate to View menu in the top toolbar, select Show/Hide, followed by Navigation Panes and open Layers. This will open a tree of layers to select, show/hide, etc. Open feature groups by clicking on > and show/hide a feature by clicking on the small box next to the feature name. Access geospatial tools by opening the Measure tool (More Tools). You can query a feature using the Object Data Tool (click on a feature of interest).
